24th April 2020 – Bangalore - Royal Orchid

25th April 2020 – Chennai – Ambica Empire

28th April 2020 – Delhi - Park Plaza

Objectives

Inventory and Warehouse Management is one of the most critical prerequisites of any Supply Chain. All organization need to maintain inventory in various forms like raw materials, work in progress (WIP) and finished products. However, maintaining inventory at optimum level is a perennial challenge. On the one hand there is risk of stock out and building up of excess inventory on the other. Hence, maintaining inventory at optimum level is essential for a business organization which can lead to additional profits.

Similarly, today's Warehouses have multifarious challenges viz. reduction of Inventory and overall cost, effective management of storage capacity, increase the inventory accuracy and above all improve the customer services.

This workshop is designed equip the supply chain and the concerned professionals with effective inventory and warehouse management strategies. The emphasis will be on movement and quick response to changing market demands.
